

*The J.A. Panuska College of Professional Studies' Service Learning Program is dedicated to the principles that a Jesuit education is grounded in developing men and women who actively and reflectively seek to make a difference in today's culture. Service that is connected to learning affirms the value of human life and enhances a lifelong commitment to justice, social responsibility, and citizenship.*

"Service, combined with learning, adds value to each and transforms both."

(Honnet & Poulsen, 1989)

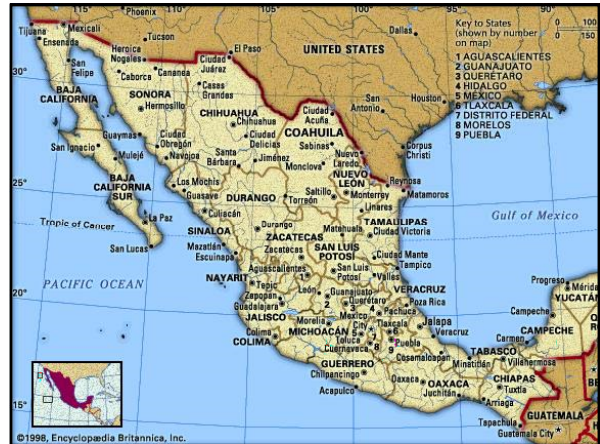

"Learning occurs through a cycle of action and reflection, not simply through... reading and lecture"

(Eyler & Giles, 1999)

The Panuska Service-Learning Student Leadership program in the University's College of Professional Studies provides students with an opportunity to perfect their talents of "service to others" in a combination of academic study and community service.

The Ignatian Identity provides the tools to be leaders in our fields and to examine our roles, values and contributions that we can make now and in the future.

The Panuska College of Professional Studies will lead the way toward high standards in intellectual rigor with experiential learning for civic responsibility.

## Guadalajara, Mexico

- UNIVA
- Teleton
- CRIT
- DIF
- Lomas de la Primavera

Assessment of changes in student perception of interdisciplinary roles and responsibilities following a joint immersion experience in Mexico

## Student reflection
